PERSONAL PROJECTS

Real-time chatting app (01/2021 - 03/2021)

- This app can be used to share messages and images.
- Technology used are firebase and its features.
- The features used : Authorization, Authentication, Real-Time database, storage, analytics, cloud messaging

Complaint management System: (03/2021 - 06/2021)

- This app will make the process of registering and resolving of complaints easy.
- This app maintains 2 databases simultaneously.
- One is a centralized real-time database (A single centralized database will be shared among every single copy of this app, get updated in real-time, and will be used to store data from every copy of the app) which will be hosted on the cloud.
- The Second database will be maintained in the local devices so that users will be able to update the database even without the internet and will only have access to its own(personal) database, not of a centralized database.

Miwok App (11/2020 - 12/2020)

- Android mobile application for children to learn simple language terms like Counting, colors, family members etc.

Pets App (01/2021 - 02/2021)

- We can create, delete, edit and read information like id, name, breed, gender, and weight about the pets, all the information is stored in a database so that it can be accessed anytime whenever needed.

CERTIFICATES

Cloud Computing Basics (Cloud 101)

Online course by Coursera

Career Edge - Knockdown the Lockdown (04/2020 - 05/2020)
